TECHNICAL SKILLS

Language: JavaScript, TypeScript, Java

IT Constructs: Data Structures and Algorithm, OOPS, Operating System, DBMS

WebDev Tools: VS Code, Chrome DevTools, Github, Figma, Netlify, Vercel, Github-pages

Frameworks/Library: Bootstrap, Tailwind CSS, React.js

Web Development: HTML, CSS, DOM Manipulation, Async JS, Node.js, Git & Version Control, Redux
Debugging & Troubleshooting, API Integration, CRUD Operations, Responsiveness.

PROJECTS

Hugry Baaz(Food Ordering Website):

[video](#)

[live ↗](#)

- Developed and launched **HungryBaaz**, an advanced web application using **React.js, Tailwind CSS, React Router, Redux**, and **Firebase** Authentication, providing a modern and engaging dining experience.
- Implemented real-time menu updates by integrating the **Swiggy API**, ensuring users have access to the latest menu information and enhancing accuracy.
- Designed a dynamic **recipe generation** feature with the help of **Gemini** and robust **search** and **filter** options, enabling users to explore various **cuisines** and **customize** their dining preferences effectively.
- Configured secure user authentication with **Google login** through **Firebase**, facilitating smooth and secure **registration and login** processes.
- Optimized the user interface with a **responsive design for desktop and tablets**, delivering a visually appealing and consistent experience across devices.
- Enhanced cart functionality to manage **add-ons, remove items**, and enforce checkout requirements, ensuring a streamlined and user-friendly purchasing process.

Ironx(Gym Website):

[video](#)

[live ↗](#)

- Developed and launched **IronX**, a cutting-edge gym website using **React, React-router, Tailwind CSS, Module CSS, Framer, and AOS**, featuring an impressive modern design and a dynamic user experience.
- Implemented advanced design elements with **Framer and AOS**, creating a visually stunning and interactive interface that enhances user engagement and site aesthetics.
- Integrated **ExerciseDb API** to fetch and display a wide range of exercises, allowing users to explore and filter exercises based on body parts through an intuitive category button system.
- Added an **AI Diet Specialist** with the help of **Gemini** feature where users input their details to receive a personalized diet and exercise plan within 10 seconds, leveraging AI to provide tailored fitness guidance efficiently.
